

A PART
OF YOUR
HOME
THAT'S
PART OF
EVERY
CONVERSATION.

WELCOME

You are a connoisseur of fine living. And every bit of your home is a reflection of that. So, why should your kitchen remain hidden?

Johnson Kitchens brings you a range of premium modular kitchens that are designed for the spotlight. Kitchens that draw your attention. That start conversations. That make you want to flaunt them.

With high-quality products and an international sense of style, a Johnson Kitchen is the perfect space to showcase the master chef in you. Let the fanfare begin.

A BIT ABOUT H & R JOHNSON

H & R Johnson (India) was established in 1958 and is the pioneer of ceramic tiles in India. Over the past five decades, the company has expanded its portfolio of products to include a range of end-to-end home styling solutions. The categories offered now include tiles, sanitaryware and bathroom fittings, wooden flooring, engineered marble & quartz and, of course, modular kitchens.

Along with its joint ventures and subsidiaries, H & R Johnson has a capacity of over 51 million m² per annum, spread across its manufacturing plants all over the country. The company's pan-India distribution network is one of the largest in the industry and consists of over 24 modern retail stores, known as House of Johnson and Johnson Corners. In addition, H & R Johnson is also associated with 1,200 dealers, 15,000 sub-dealers and a large network of retail franchisees.

Equipped with its future-ready R&D department, cutting-edge innovations and diversified product portfolio, H & R Johnson is always ahead of the times. Making it the most preferred home lifestyle brand in India.

AN INTRODUCTION TO MODULAR KITCHENS

What exactly is a modular kitchen? It is simply a term used for the modern-day kitchen furniture layout which is especially designed to optimize functionality and the use of space. These kitchens use various modules (units) of cabinets that are crafted out of diverse materials and hold kitchen accessories inside.

The basic structure of a modular kitchen is extremely practical. The units on the floor are called 'base cabinets' and serve as the foundation for the kitchen worktop which is usually made out of granite, marble, tile or wood. The ones fastened on the wall for storage purposes are known as 'wall cabinets'. There is even a 'tall storage unit' created for smaller kitchens and apartments.

While these modules form the framework, a modular kitchen also constitutes wooden cabinets, counter tops, internal accessories, as well as electro-domestic gadgets like a chimney, hob, built-in oven and sink. In some high-end kitchens, a refrigerator and dishwasher may also be included.

A designer usually creates the kitchens using modules of standardized sizes that can be adapted to individual spaces. The modules are used in various combinations to get a range of modular kitchens. So, it's never too difficult to find one that will suit exactly what you need.

THE JOURNEY OF JOHNSON KITCHENS

These days, a dream home is all about the details. Constant international travel and the digital era have influenced aesthetics, style and the demand for distinctive products. You plan your home meticulously, with a lot of attention and care. To make it look exactly the way you want. So, why should you settle for anything less?

Responding to your needs and these opportunities, H & R Johnson ventured into the realm of marketing modular kitchens in 2007. And in 2009, the brand of Johnson Kitchens was born. Today, Johnson Kitchens brings you a range of high-quality products, with international styles and finishes at reasonable prices.

Each one of these is designed keeping your requirements in mind. Since modular kitchens can be visualized, you will always know what to expect in terms of the finished design and layout. You can even incorporate lighting, soft closing shutters/drawers and high-end accessories to give your kitchen a distinct identity. Whatever you choose to do, rest assured your beautiful Johnson Kitchen will always take centrestage.

TYPES OF KITCHENS

Modular kitchens come in multiple shapes, styles and arrangements. But one thing remains common across all of them – the work triangle. This is a basic and scientific principle that has been used in designing ergonomic and functional kitchens through the years.

The idea behind this is quite simple. You should be able to draw a triangle between the 3 ‘work centres’ of the kitchen. These are:

- 1) The hob – A place where the food is cooked.
- 2) The refrigerator – A place which is most likely to store the food.
- 3) The kitchen sink – A place where the food is cleaned and prepared for cooking.

Ideally, the distance between these 3 work centres should be fixed in the kitchen. According to the norm, the 3 sides of the triangle should be between 1.2 metres and 2.7 metres (i.e. between 4 feet and 9 feet), adding up to a total of between 4 metres and 7.9 metres (i.e. between 13 feet and 26 feet).

The kitchen work triangle is based on the insight that you are likely to perform several different tasks to prepare a meal. Therefore, this work space is designed ergonomically, reducing the time, distance and effort you use while cooking. If there is more than one person in the kitchen, individual spaces should not be affected by each other.

Most modular kitchens are designed keeping the kitchen work triangle as their fulcrum. Offering you an extremely efficient kitchen experience.

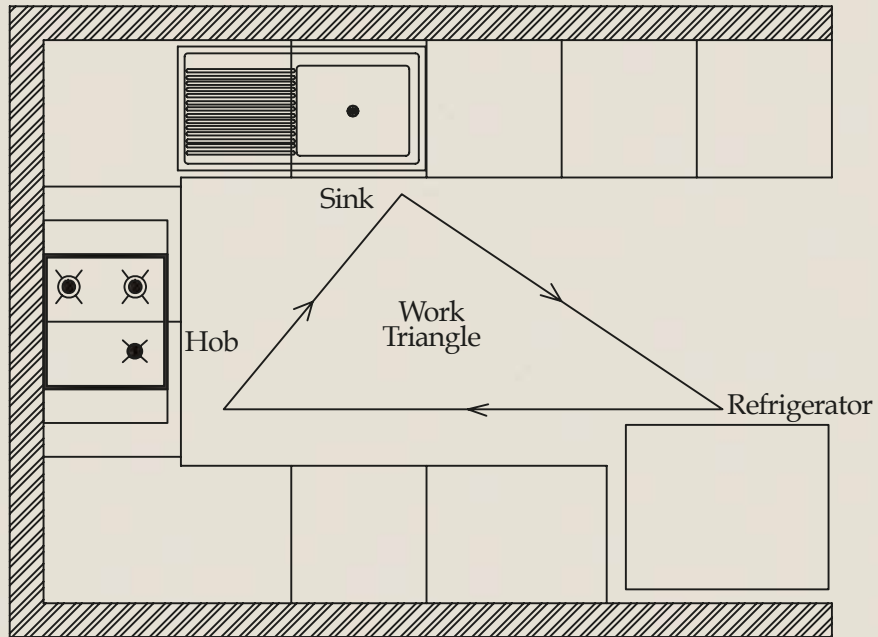

ISLAND KITCHEN

The island kitchen has one of the three main elements, especially the hob, placed separately from the cabinets. The setup makes it look like an isolated island.

PENINSULA KITCHEN

In a peninsula kitchen, as the name suggests, the cabinets surround the work area in the kitchen on three sides.

U-SHAPED KITCHEN

The U-shaped kitchen is the most versatile layout for kitchens, regardless of whether they are large or small. The layout offers continuous counter tops and ample storage, which surround the space to access the stored items easily.

L-SHAPED KITCHEN

The L-shaped kitchen is one of the most popular models. The work triangle in this layout is uninterrupted by the movement of people and there is ample room for appliances.

PARALLEL KITCHEN

The parallel kitchen has a workspace large enough for one cook. In this kitchen floor plan, the work domains face each other on parallel walls, creating a small triangle.

STRAIGHT LINE KITCHEN

The straight line kitchen floor plan is ideal for smaller kitchens. The work triangle in this kitchen layout is less like a triangle and more of a walk, with all the three main elements along one side of the wall.

OUR RANGE OF KITCHENS

As the leading brand of home solutions in India, it is imperative that we keep our Indian clientele's unique needs in mind. This includes lifestyles, cuisines, cooking styles eating habits and much more. Our range of kitchens is designed to cater to Indian sensibilities in a way that is rarely found in the international market. Combining world-class technology and our country's distinctive requirements, we offer you a variety of modular kitchens to choose from. Your home could be traditional or modern, chic or ethnic – with Johnson Kitchens you will find the perfect complement for your home.

- Available in marine ply, MDF and particle board
- Quick and hassle-free installation
- Available in all variants of front finishes, laminates, membranes, melamine as well as in painted, acrylic, back-painted glass etc.
- Also available in fully and semi-modular styles

WHEN TO BUY YOUR JOHNSON KITCHEN

Buying and planning your kitchen requires some expertise. Here are a few simple steps that will ensure you make the ideal choice and set it up perfectly for your home.

- There are two scenarios in which you will plan a kitchen – while buying a new house, or while renovating your present home.
- In the first case, the best time to plan your kitchen is at the plastered level, before the builder provides platform.
- While renovating, it's best to plan the layout after your existing kitchen is demolished.

HOW TO PLAN YOUR JOHNSON KITCHEN

- When you plan your kitchen, our supervisor or designer will first undertake a site visit to get all the detailed measurements of your kitchen. This will also help them understand your requirements.
- If you need any extra storage space, appliances and so on, remember to inform the designer at this stage itself. This is so that your kitchen can be planned and designed in a systematic way.
- Once the cost and design of your kitchen is finalized, we will give you all the electrical, tiling and plumbing details according to the final layout.
- After all the civic work is done, our team will take the final measurements of your kitchen and will also inform you if there are any changes in design due to civil changes at the site.
- Then, we will place the order and have it delivered within the required time frame, with the finish and material selected by you.
- After installing your kitchen, our service department will also provide you with a warranty card so that you can contact us easily for any service issues.

WHY JOHNSON MODULAR KITCHENS

Like all our home styling solutions, Johnson Kitchens also offers world-class quality and premium products. There are a host of facts that explain why Johnson Kitchens are the best choice for you.

- We are the only company that offers you an extensive choice of not just Indian, but also European kitchens. And you can easily explore your options with our widespread reach across the country.
- We go beyond expectations and provide you with modular components for your kitchen as well as complete kitchen design solutions.
- Each one of our state-of-the-art modular kitchens comes with a warranty of quality and excellence.
- Our kitchens are planned keeping your needs in mind. Their ergonomic design offers you the perfect combination of convenience and easy accessibility.
- All our kitchen components are powered with world-class hardware, and all wooden elements comply with ASTM standards. So you never have to worry about technical quality with us.
- The Johnson Kitchens team comprises experienced designers and expert technicians who make sure that your kitchen has a hassle-free installation from start to finish.

A complete kitchen is defined in 3 activity areas – cooking, storage and washing . At Johnson Kitchens, we regard these as the most important elements while designing our kitchens. And by combining all the components in an efficient and aesthetic way, we offer you unique kitchens that include storage, electro-domestic stations, work tops and accessories.

Along with all this, the biggest advantage of purchasing a Johnson Kitchen is the trust associated with our brand. With expertise and respect earned over so many years, we, at Johnson Kitchens, will always respond to your needs. You are, and will remain, our priority.
